COURTNEY ROGERS

Web Developer

New York, NY | github.com/courtney | courtney@email.com | 555-555-5555

WORK EXPERIENCE

DROPBOX

Web Developer | 2018 - Current

- Migrated CoffeeScript React components to TypeScript and added full test coverage.
- Improved web file preview load times by 15% by removing third-party libraries.
- Contributed to the React server rendering project to improve initial page loads for users on high latency internet connections.
- Developed and maintained the promise based open source Dropbox JavaScript SDK.

FACEBOOK

Software Engineer, React | 2013 - 2018

- Part of the React core team responsible for maintenance of the open source project.
- Designed and implemented the reconciliation algorithm that improved the developer experience while also offering performant rendering.
- Added support for CSS in JS, allowing components to be styled without CSS files.
- Core contributor to the release of React hooks, which aided the transition to functional components.

PARSE

Front End Developer | 2011 - 2013

- Parse was acquired by Facebook in 2013.
- First engineering hire. Responsible for setting up bundling, testing, asset management, UI components, and much more.
- Worked closely with early users to iterate on and improve dashboard UI.

EDUCATION

MIT

BS Computer Science | 2009 - 2013

Research assistant at the MIT Media Lab.

SKILLS
